

Find and circle any acetals, ketals and related structures that hide a carbonyl group.

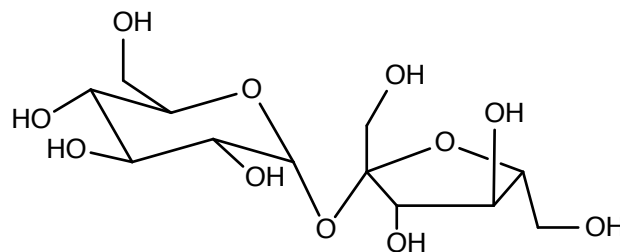

Chemistry 310  
Prof. B. Hanson

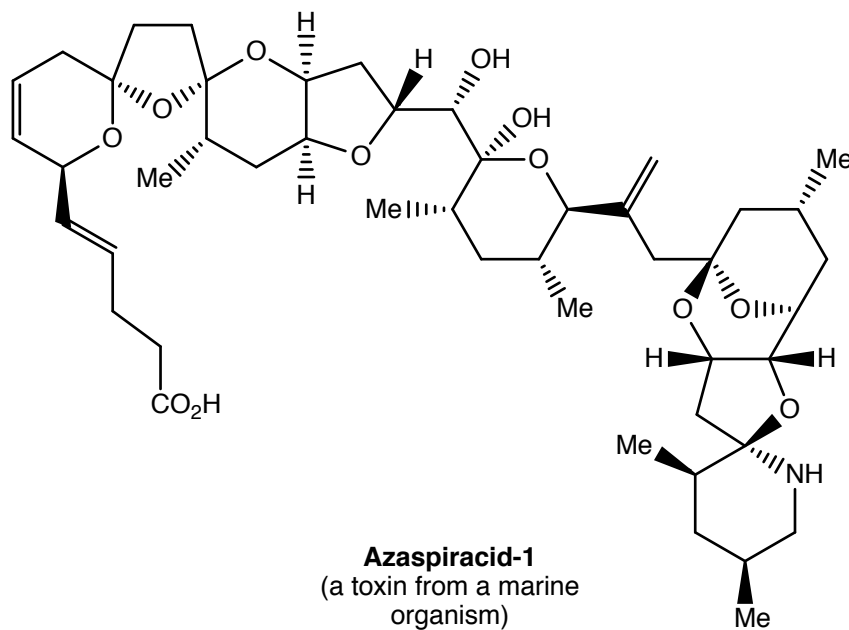

**Physostigmine**  
(the molecule Percy made)

**IPTG**  
(isopropyl thiogalactopyranoside)  
used to induce gene expression  
in the lac operon

**Sucrose**  
(do you remember why  
this is *not* a reducing sugar?)

**Azaspiracid-1**  
(a toxin from a marine  
organism)
